

# MASTER PROMPT — REPLICATE THIS GITHUB README STYLE EXACTLY

Act as a world-class GitHub Profile README designer.

Your task is to generate a COMPLETE GitHub README.md file.

IMPORTANT: I do NOT want a simplified version. I do NOT want an alternative design. I do NOT want a different layout.

I want the README generated in EXACTLY the same structure, styling, spacing, visual hierarchy, markdown formatting, badge usage, tables, collapsible project sections, GitHub analytics blocks, and overall aesthetic as the reference README.

Requirements:

## Design Theme

- Dark luxury aesthetic
- Purple / Indigo / Violet gradient theme
- Enterprise-grade engineering profile
- Premium FAANG-style portfolio
- Recruiter-friendly
- Modern and minimal
- No personal photos
- No project screenshots
- No placeholder images
- Use only SVG widgets, badges, GitHub stats, contribution graphs, and markdown layouts

## README Structure (MUST FOLLOW EXACT ORDER)

1. Animated Header Section
  - a. Capsule Render wave banner
  - b. Typing SVG animation
  - c. Academic badges
  - d. Location badge
  - e. Portfolio button
  - f. LinkedIn button

- g. Email button
  - h. GitHub button
  - i. Profile views badge
  - j. Followers badge
  - k. Stars badge
2. About Section
- a. Professional engineering-focused biography
  - b. Strong emphasis on software engineering
  - c. AI/ML expertise
  - d. Full stack development
  - e. Product engineering mindset
  - f. Open To section
3. Tech Stack Section
- a. Languages
  - b. Frontend
  - c. Backend & Databases
  - d. Cloud, DevOps & Tooling
  - e. Use Skill Icons
4. AI / ML Expertise Section
- a. Markdown table
  - b. Domain
  - c. Proficiency
  - d. Details
5. Featured Projects Section

Use collapsible markdown blocks:

**Project Name**

Project description

Markdown table with:

- Stack
- Scale
- Performance
- Security
- Impact
- Repository

Professional project explanation

Repeat for all projects.

6. Experience Section

Job Title Company Name

Date Range

Professional description

Scope of work bullet points

Skills tags

#### 7. Achievements Section

Centered markdown table

Columns:

- Recognition
- Details

#### 8. Certifications Section

Group certifications by provider

AWS

Oracle

NPTEL

Cisco

Use badges

#### 9. Coding Profiles Section

Large premium badges

LeetCode

GeeksforGeeks

HackerRank

CodeChef

#### 10. GitHub Analytics Section

github-readme-stats

streak-stats

top-languages

#### 11. GitHub Trophies Section

#### 12. Contribution Activity Section

github-readme-activity-graph

#### 13. Contribution Snake Section

snake animation

#### 14. Current Focus Section

YAML code block

Learning

Building

Exploring

Open To

## 15. Connect Section

Gmail

LinkedIn

GitHub

Portfolio

## 16. Footer Section

One-line professional quote

Capsule Render footer banner

## Formatting Rules

- Use markdown separators exactly:

between sections.

- Use centered HTML blocks where appropriate.
- Use markdown tables.
- Use collapsible project cards.
- Maintain consistent spacing.
- Use premium badge styling.
- Use flat-square and for-the-badge styles appropriately.
- Keep typography professional.
- No excessive emojis.
- No flashy colors except purple, indigo, violet, and blue accents.
- All links should be clickable.
- GitHub widgets should be production-ready.
- Output ONLY valid README.md code.
- Do not explain anything.
- Do not add comments.
- Do not describe the design.
- Return the entire README in a single markdown block.

## Quality Target

The final README should look like:

- Top 1% GitHub Profile
- Senior Software Engineer Portfolio

- AI Engineer Portfolio
- Open Source Contributor Profile
- FAANG-level GitHub Branding
- Premium Enterprise Developer Presence

Generate the README now.
